Map - Potential CTN Sites.....	102
Appendix D – Sustainability Activities and Analysis	103
Introduction	103
Network Infrastructure and Operational Costs estimation	103
FCC Standard Rural Health Care Program (“Standard” Program)	104
California Public Utilities Commission California Teleconnect Fund (CTF) Program.....	104
Monthly Subscription Fee and Participant Survey Status.....	105
Additional Participants Who Make “Fair Share” Payment Support	105
Summary.....	106
Appendix E - Description of the University of California PRIME Program	107
Significant Features of Rural-PRIME	108

1. Project Contact and Coordination Information

Project Leaders

Thomas Nesbitt, MD, MPH
Executive Associate Dean
School of Medicine
UC Davis Health System

Co-Project Director
California Telehealth Network, Project Coordinator

Cathryn Nation, MD
Associate Vice President
Health Sciences and Services
University of California, Office of the President

Co-Project Director
California Telehealth Network

David J. Harry, Ph.D.
Center for Health and Technology
UC Davis Health System

Director of Operations
California Telehealth Network, Associate Project Coordinator
Phone #: 916-734-3008
FAX #: 916-734-3580
Email: David.harry@ucdmc.ucdavis.edu

Responsible Administrative Official

Thomas Nesbitt, MD, MPH
Executive Associate Dean
School of Medicine
UC Davis Health System

Co-Project Director
California Telehealth Network, Project Coordinator

Address:
Vice Chancellor/Dean's Office
UC Davis School of Medicine
4610 X Street, Suite 3101
Sacramento, CA 95817

Phone #: 916-734-3008

FAX #: 916-734-3580

Email: Thomas.nesbitt@ucdmc.ucdavis.edu

Responsible Organization

<http://www.ucop.edu>

Statewide Coordination

The California Telehealth Network (CTN) project is being managed at the highest level, through the Office of the President of the University of California. Operational responsibility has been delegated to the following entity within the University:

Center for Health and Technology
University of California Davis Health System
2300 Stockton Blvd, Suite 3900
Sacramento, CA 95817

CTN operational management also receives guidance and operational support from the large group of CTN Consortium Member organizations. The CTN Consortium was originally formed in order coordinate and consolidate multiple independent RHCPP proposal initiatives, with the aim of submitting a single proposal that represented the interests of the State of California. The Consortium was formed specifically at the direction of the Governor's Office. A list of CTN Consortium Member organizations is provided in Appendix A. The CTN Consortium advises and informs CTN project management through the CTN Advisory Committee, whose members represent rural health care providers, state government organizations, as well as non-profit health care funding organizations. Statewide coordination of the CTN project is greatly facilitated by the willing investment of time, resources and expertise provided by the CTN Consortium members.

2. Identify All Health Care Facilities Included in the Network

The CTN has initiated numerous statewide communications activities aimed at enrolling prospective CTN participants. To date, over 900 health care facilities have signified their intention to participate by submitting a Letter of Agency. Appendix B provides a detailed list of facilities. Appendix C provides various statistics regarding the Participant complement, including: 1) distribution by facility types (e.g., hospital, clinic, etc.); 2) Rurality; 3) geographic distribution by California County. The process of evaluating the eligibility of each prospective participant, as designated in FCC Order 07-198, Appendix D, paragraph 2.a-b, is currently under way, but has not been completed. The process of collecting, evaluating and editing LOA's and associated eligibility information for the large complement of Participant sites has proved to be a very complex and labor-intensive process. At the time of filing of the July, 2008 Quarterly Report, we had anticipated completing the eligibility review process by mid-August, 2008. To date, approximately 620 sites of a total complement of 930 sites have been fully qualified as eligible by USAC. We are continuing in our efforts to qualify as many of the remaining 300+ sites as possible.

California Telehealth Network Quarterly Report –10/30/2008- 4

The remaining 300 sites yet to be qualified are clustered into three general categories:

1. Mental Health Facilities (approximately 85 sites) – since only certain types of facilities that provide mental health services qualify under the RHCPP Order, USAC requires that a Mental Health Questionnaire Form be completed by each of these facilities in order to provide the necessary additional information to determine whether they meet eligibility requirements. We have contacted all such sites and are in the process of collecting the Questionnaires.
2. County Public Health Clinics (approximately 65 sites) – obtaining authoritative certification of eligibility for Public Health clinics in California is a complex process. Certain smaller counties rely upon state agencies to certify their clinics, while various larger counties maintain their own certification requirements and processes. Given that there are 58 counties in California, it is a non-trivial task to determine the authoritative source for certification for the Public Health Clinics distributed broadly among the various counties. We are currently working through the process of identifying the authoritative source for certification for each County Public Health Clinic among our Participant candidates and obtaining eligibility documentation acceptable to USAC.
3. Miscellaneous sites (approximately 100) comprising: 1) clinics that have submitted incomplete or ambiguous documentation; 2) administrative sites for health care consortiums for which additional documentation is required confirming that they provide essential administrative functions supporting clinical activities.

Since gathering of the remaining required information could require a protracted period, in the interest of proceeding with the CTN RHCPP, the following strategy has now been adopted. We anticipate that between 600 and 700 Participants out of the entire complement of 900+ will have been qualified by USAC by the end of October, 2008. If that numerical target is achieved, CTN intends to formally post the initial Form 465 and associated RFP, including in the submissions only those Participants who have been qualified to date as eligible. During the intervening months between posting and receipt of a funding commitment letter (FCL), we will expend ongoing efforts to qualify the outstanding complement of pending Participants. Moreover, we intend to use the interim period to target additional recruitment efforts throughout the state in three principal areas: 1) tribal sites; 2) eligible sites located in extremely rural areas currently served by marginal or inadequate telecommunications infrastructure; 3) rural sites that have been designated as affiliate sites for the UC PRIME Program, a \$200M UC program to train medical students for practice in rural and underserved communities (see Appendix E - Description of the University of the UC PRIME Program). Following receipt of the FCL, we will initiate a second posting and include all the sites previously pending eligibility verification, as well as any new sites added since the initial posting. The second RFP posting will be left open for the minimally required 28 day period. At the end of this “two posting” process, all sites for which LOA’s have been gathered will have been evaluated and all eligible sites will have been formally enrolled in the CTN RHCPP. We anticipate initiating actual project build-out in the first quarter of 2009.

3. Network Narrative

CTN has not yet submitted an RFP for posting by USAC. Consequently, CTN will defer providing a detailed network narrative until the Quarter following selection of vendor(s) and finalization of network architecture.

4. List of Connected Health Care Providers

CTN has not yet implemented any network construction activities.

5. Identify the Following Non-recurring and Recurring Costs

CTN has not has not encumbered any reimbursable expenditures.

CTN has received a \$3.3M pledge from the California Emerging Technology Fund, (CETF, a non-profit, state government-chartered company) that has been specifically designated for funding of the 15% required co-payment for reimbursable expenditures. This represents 100% of the required co-payment funding for the CTN RHCPP.

6. Describe how Costs have been Apportioned and the Sources of the Funds to Pay Them

CTN has not encumbered any reimbursable expenditures that are subject to apportionment to multiple funding sources.

7. Identify any Technical or Non-technical Requirements or Procedures Necessary for Ineligible Entities to Connect to the Participant's Network

CTN has not begun network construction. Discussions are currently underway with various for-profit and other ineligible health care facilities, in an effort to establish guidelines and standards for accommodating their participation. Until vendor(s) have been selected and accurate estimates of project cost are obtained, it will not be possible to provide ineligible potential participants with responsible participation costs. Consequently, CTN will defer a detailed response on this issue to the appropriate future Quarterly Report, after accurate project costs have been determined.

8. Provide an update on the project management plan

CTN has not formally begun the implementation phase of the project. The current project plan details the steps and approximate timeframe for completing the RFP process, following submission of Form 465, the first CTN RFP and associated materials to USAC. Submission is currently scheduled for the end of October or early November, 2008. The following is the approximate schedule of events following the formal posting of the CTN RFP on the USAC RHCPP website (based upon an approximate review period by USAC of 30 days).

Schedule of Events

Event	Date
Release of Request for Proposals	Day 1*
Receipt of Bidders' Written Questions on RFP	Day 2 - 45
Receipt of Proposals	Day 2 - 60
Semi-Finalist Bidder Notifications	Day 90 - 95
Oral Presentations (if deemed necessary)	Day 120 - 130

Completion of Evaluation Process and Award Announcement	Day 140
Initiation of Contract Negotiations	Day 150

** Number of days following posting of CTN RFP #2008-001 on the USAC Website (schedule is approximate)*

9. Provide Detail on Whether Network is or Will Become Self-Sustaining

CTN has begun discussions with numerous municipal, county government agencies, as well as for-profit healthcare providers, in an effort to develop a self-sustainability model. Central to completing these discussions however, will be the need to provide comprehensive quotations of “fair share” participation costs. Appendix D contains a description of current cost analysis and sustainability plan development efforts.

10. Provide Detail on How the Supported Network has Advanced Telemedicine Benefits

CTN has not begun implementation of the network. Consequently, no benefits directly attributable to the CTN have been derived.

11. Provide Detail on How the Supported Network has Complied with HHS Health IT Initiatives

- a. Interoperability Standards: the network has been designed as an “open network”, complying with industry-standard protocols.
- b. The network has not deployed any applications to date. CTN intends to adhere to CCHIT standards in selecting and implementing applications.
- c. The CTN will interconnect with Internet 2 and National LambdaRail national networks. This will permit CTN to interoperate with all current and planned NHIN activities and initiatives.
- d. To date, the network has not yet used resources from the AHRQ National Resource Center for Health Information Technology.
- e. University of California Davis Health System (UCDHS), the operational lead organization for the CTN, is actively involved in bioterrorism and pandemic response activities. Several members of the UCDHS Center for Health and Technology (CHT) are actively involved in this work and will be advised to coordinate the CTN-related activities with HHS Secretary for Public Response.
- f. UCDHS CHT will participate with CTN management to facilitate interoperability with public health and emergency organizations. CHT currently has a \$5 million grant from DHHS to develop Emergency Department Surge Capacity coordination. Part of this work will involve developing collaborative and cooperative agreements among local, county and regional emergency response agencies and public health organizations. Efforts are currently under way to coordinate the selection of sites for the DHHS project in such a fashion that there is maximal overlap between DHHS and CTN sites. In this fashion, the CTN will become a core component of region and statewide efforts to develop emergency response and disaster preparedness programs and infrastructure. CHT and CTN management will expand the coordination efforts to include HHS and CDC interoperability requirements, as the network is actively deployed.

12. Explain How the Selected Participants Coordinated in the Use of Their Health Care Networks

CTN will implement ongoing efforts to comply with DHHS programs to provide access to network services during national, regional or local public health emergencies. CTN has initial plans to facilitate access through two means:

1. UCDHS has received a \$5M grant from DHHS as part of their Emergency Department Surge program to develop effective health care coordination capabilities in the event of public health emergencies. UCDHS has selected rural health care facilities that will co-participate in both programs. In this fashion, the capabilities of CTN to support coordination of geographically distributed health care resources on a regional basis will be developed.
2. CTN will connect to both National Lambda Rail and to Internet 2 national networks. Through these connections, DHHS will have unrestricted access to the CTN network, thereby providing integration at a national level.

Appendix A – CTN Consortium Member Organizations

Health Care Providers:

- The University of California System (UC)
- The UC Office of the President (*Managing Partner*)
- The UC Davis Health System (*Project Management Lead*)
- Rural health networks and coalitions
- The Northern Sierra Telehealth Network
- The Community Clinics Health Network (CCHN)
- Central Valley Health Network (CVHN)
- The Southern Sierra Telehealth Network (SSTN)
- Open Door Health Network/Open Door Community Health Center (ODCHC)
- The Indian Health Service (IHS) network

Governmental Partners:

- The Office of the Governor
- California Health & Human Services Agency (CHHSA)
- The Office of Statewide Health Planning and Development (OSHDP)
- California Business, Transportation and Housing Agency (BTH)
- The California Department of Managed Health Care (DMHC)
- The California Office of Emergency Services (OES)
- The California Public Utilities Commission (CPUC)
- The California Emerging Technology Fund (CETF)
- The California Institute for Telecommunications and Information Technology (Cal IT2)

Other Organizations:

- The California Hospital Association (CHA)
- The California Health Foundation and Trust (CHFT)
- The California Telemedicine & eHealth Center (CTEC)
- The California State Rural Health Association (CSRHA)
- The California Primary Care Association (CPCA)

Map - Potential CTN Sites

Appendix D – Sustainability Activities and Analysis

Introduction

CTN will continue to develop sustainable funding and reimbursement sources with the intention of achieving self-supporting status by the end of the RHCPP five-year funding period. The following is a summary of activities currently underway to develop both near-term funding that will augment the FCC RHCPP funds during the term of the program, as well as long-term funding that will support the CTN program following termination of the RHCPP. We anticipate that developing multiple funding sources will be necessary in order to provide for robust, reliable support. We have identified several potential funding sources and have initiated activities to develop them. The following sections discuss potential funding sources and related activities to develop them.

1. Estimation of projected network infrastructure and operational costs.
2. Identification of CTN Participant sites that would also qualify under the FCC USF Standard Rural Health Care Program.
3. Identification of funding opportunities under the California Public Utilities Commission's "California Teleconnect Fund" program.
4. Survey of the prospective CTN Participant membership in order to determine an initial willingness to pay a regular subscription fee.
5. Recruitment of Additional Participants who provide "fair share" payment support:
 - a. Development of significant long-term funding opportunities from consortia of non-profit health care funding organizations.
 - b. Participation in the CTN by for-profit regional and statewide health care organizations.
 - c. Participation by municipal, county and state government agencies.

Network Infrastructure and Operational Costs estimation

Since the CTN has not yet issued its first RFP, it is not possible to precisely define the overall costs for design, installation and operation of the CTN network infrastructure. Nonetheless, it is possible to make reasonably responsible pro forma estimates based upon a pricing structure that is broadly available to state government affiliated organizations through the California State CalNET 2 Program. The pro forma estimates are based upon the following reasonable assumptions:

1. CalNET 2 pricing levels will be achievable for the CTN (a CTN RFP requirement)
2. Vendor offers statewide flat-rate pricing ("postalized" rates, available under CalNet 2).
3. Network architecture comprises an MPLS-routed, IP-based private network.
4. Majority of actual network build-out will occur in Year One.

Based upon these assumptions, it is possible to derive an approximate price-per-connection of between \$400 - \$500 per month per Participant site. Using a similar logic and methodology, the following price estimates have been made:

Description	Unit Cost	Total Cost (900 Participants)
Participant Connection Cost (per month)	\$400 - \$500	\$360K - \$450K
Connection to Internet 2 and NLR (per month)	\$10,000	\$10,000

Total Program Network and Infrastructure Costs

Annual Network Infrastructure Cost (900 Participants)	\$4.4M - \$5.5M	
Total Five Year Program Cost (900 Participants)	\$22M - \$27.5M	

CTN currently has additional qualifying funding commitments for deferral of the 15% charges allocable to the program from the California Emerging Technology Fund (CETF), in the amount of \$3.3M, yielding a total program funding amount of \$25.4M. CTN has additional funding commitments pending in the amount of \$5M.

Since the administrative expenses associated with the CTN program are not eligible for reimbursement under the RHCPP, we are currently seeking additional sources of funding to cover these expenditures. Currently, the University of California is providing primary “in kind” support for the CTN program. CETF has also provided an additional \$300,000 in bridge funding to support administrative and operational expenditures. This amount is in addition to their \$3.3M pledge to support the required 15% payment by CTN.

In summary, the projected annual funding required to support network and infrastructure expenditures for Year 6 and beyond (calculated in 2008 dollars) totals \$4.4M - \$5.5M.

FCC Standard Rural Health Care Program (“Standard” Program)

Based upon a preliminary analysis by USAC of the 900+ Participant sites submitted for the CTN program, it is estimated that 30% of the sites are eligible for the Standard Program. Using this figure, as well as the estimated cost to connect each Participant, we derive the following:

Description	Cost
Connection Cost per Participant under CTN RHCPP	\$500
Urban T1 Cost (actual quoted cost, Sacramento CA)	\$150
(CTN RHCPP Cost – Urban Cost) x 0.6	\$210

We estimate that approximately 200 – 300 CTN Participants will qualify for the FCC Standard Health Care Program, following termination of the RHCPP. Each site will qualify for an approximate \$200 per month offset.

California Public Utilities Commission California Teleconnect Fund (CTF) Program.

The CTF will provide 50% reimbursement for remaining telecommunications expenses for eligible health care providers, after all other third-party payer amounts have been deducted. For CTF purposes, all Participants that are eligible under the RHCPP are also eligible under CTF. After lengthy discussions and negotiations with the CPUC, we have determined that during the RHCPP funding period, the CTF will fund 7.5% of the monthly network charges for each of the

CTN Participants. For the estimated \$500 per month charge, the reimbursement amount would be \$37.50, regardless of rurality status. The percentage reimbursement from CTF following termination of the RHCPP would in principal, be greater. We are currently engaged in discussions with CPUC in order to determine the potential funding amounts that will be available to eligible CTN Participants following termination of the RHCPP.

Monthly Subscription Fee and Participant Survey Status

During Summer, 2008, CTN surveyed over 500 potential Participant sites in order to determine how best to structure the network and which services would be of most interest. Following is a very brief itemization of survey topics:

1. Interest in participating in the CTN
2. Telemedicine and other clinical services that would be of value
3. Educational services of interest
4. Technical and administrative expertise available at the local site
5. Technical and administrative expertise desired from CTN
6. Telecommunications services currently supported
7. Cost of currently supported telecommunications services
8. CTN monthly subscription fee that would be acceptable

The final survey query is particularly relevant to the CTN development of a sustainable infrastructure. The median acceptable monthly subscription fee was found to be \$200. We are currently anticipating that a monthly subscription fee will be levied against all CTN Participants, beginning with their initial enrollment in the RHCPP and continuing throughout their membership. The subscription fees may be levied incrementally: during the RHCPP funding period, a lower fee will be levied. At the termination of the RHCPP, a fee of approximately \$200 will be levied. We are in the process of developing a Memorandum of Understanding (MOU) that all Participants will be required to execute as part of membership. The MOU will delineate the requirement to pay a reduced subscription fee throughout the RHCPP funding period, followed by a subscription fee sufficient to cover remaining costs after all other payor sources have been applied. We estimate this final amount to be approximately \$200 - \$300 per month.

Additional Participants Who Make “Fair Share” Payment Support

A large number of for-profit health care and other commercial organizations have expressed interest in accessing services on the CTN. We are actively engaged in discussions with these groups. Invariably the question arises: “what will be the cost to participate?” Following completion of the initial CTN RFP process, a detailed financial pro forma will be prepared that will inform interested organizations. We will remain cognizant of the requirement that during the tenure of the RHCPP, ineligible entities must pay their “fair share.” We anticipate that dependent upon services requested, we will charge a premium above fair share that will serve to offset operational and administrative expenses. CTN is also engaged in active discussions with major non-profit health care funding organizations that have expressed an interest in providing grants and other funding for CTN activities. These efforts are in the early phases of discussion, but could lead to significant underwriting of CTN health care activities.

Summary

CTN has already begun developing funding sources and reimbursement models that will ultimately lead to a self-supporting network. Three principal sources will provide significant funding:

1. Eligible rural Participants will apply for funding under the USF Standard Program.
2. California Public Utilities Commission, California Teleconnect Fund will provide as much as 50% reimbursement of eligible telecommunications expenses.
3. Individual CTN Participants will be required to execute a Memorandum of Understanding that specifies a certain tenure of membership (five years or more) as well as agreeing to pay a monthly subscription fee.
4. CTN is actively seeking additional funding sources from non-profit health care funding organizations, as well as for-profit organizations that may pay “fair share” plus an additional increment.

We will strive to ensure sustainability of the CTN by developing these funding sources. We anticipate that well in advance of the termination of the RHCPP, CTN will have developed effective agreements with state, federal and non-profit healthcare funding organizations, as well as for-profit health care organizations. These in aggregate, will provide a significant percentage of funding needs. Any residual amounts will be allocated out to the membership at large in the form of a monthly subscription fee.

CTN will provide a much more in-depth sustainability plan in the quarter report following completion of the initial RFP process (estimated Q1, 2009), when actual projected costs for network services and infrastructure have been obtained.

Appendix E - Description of the University of California PRIME Program

Rural-PRIME

Training California's future doctors to meet the needs of rural communities

With a founding mission that emphasizes community service, UC Davis School of Medicine recently launched a new program to help increase health-care access for underserved populations living in rural areas.

Called "Rural-PRIME," this unique program is designed to train the best and the brightest students for a fulfilling career in rural primary care medicine. It is an opportunity that offers a range of experiences, from public health and community service to the use of leading-edge medical technologies like telemedicine.

Rural-PRIME is a combined, five-year M.D. and master's degree program. It focuses on developing physicians who can become leaders and advocates for improving health-care delivery throughout the state's smaller, more isolated communities. Rural-PRIME offers an innovative curriculum, beginning with the first year of medical school. It is specifically geared toward students from rural backgrounds who have a strong desire to make a difference in communities like the ones they were raised in.

Significant Features of Rural-PRIME

- Clinical experiences through rural preceptorships and immersion in rural communities
- Mentoring by rural physicians for a deeper understanding about the small community practice and public health leadership
- Clinical technique (Doctoring) courses taught by rural physician faculty, with an emphasis on cultural sensitivity and rural case studies
- Integrated master's degrees in Public Health, Medical Informatics or other health-care related fields
- Core clinical clerkships focusing on culture, health-care issues, epidemiology and economics in rural California
- Extensive experience and opportunities to use the latest health-care technology and telecommunications:
 - Computerized patient simulators at UC Davis Center for Virtual Care provide realistic experience and training in emergency medicine and trauma care;
 - Innovative clinical training center, with patient actors, offers skills training in a life-like setting;
 - High tech telemedicine connections, offering quick access for remote areas to the specialty care of UC Davis Health System (as a longtime leader in the use of this technology, UC Davis now has an internationally recognized program);
 - State-of-the-art medical education facility, with 'smart' classrooms and distance learning capabilities, connecting rural physicians with the resources of an entire academic health system.

California Telehealth Network Q1

UC DAVIS
SCHOOL OF MEDICINE

"Students at UC Davis will train for rural medicine in a way far different from their predecessors. Our focus combines team medical practice, advanced information and telecommunication technologies and evidenced-based medicine, while still recognizing what has always made rural medicine fulfilling and fun: that broad scope of practice, great relationships with patients and the knowledge that you are making a difference."

Thomas Nesbitt, M.D.,
Executive Associate Dean,
UC Davis School of Medicine

Rural-PRIME is part of the University of California's "Programs in Medical Education."

It is designed to produce physician leaders who are trained in and committed to helping California's underserved communities.
